REWILL BE RESUMED ON A LARGE SCALE IN CALIFORNIA. A Small Bit of Ground in Montana Sells for

Arisonn's Large Copper Product-New Stamp Mills Going to the Alaskan Mines. Los Angeles, Nov. 6.-The Miners' Association is making a strong effort to start the construction of retaining dams for hydraulic mines, for which the sum of \$500,000 is available. When these dams are completed hydraulic mining will be resumed on a large scale. The has been suggested of carrying alickens from the mines in pipes to the tule

and the water turned back into the river. More deep mining is to be done in Amador county. The Centennial, closed down since 1878, has been bonded to the Columbia Mining Company and will be reopened and sunk to the being put down to the same depth.

lands, where the sediment would be deposited

big dam in the Feather River, Butte county, has been blown up by the owners because it backed the water so far and so deep up the river that the mining of the river bed me too difficult. Three new dams will be built, costing \$250,000, which will make it possible to work the river bed at all seasons of the year. The Blackley mine at Nimshew has been bought by San Francisco capitalists, who will work it by the novel method of hydraulicking under ground. They will sink a perpendicular shaft over 300 feet from the top of the mounain and from the lowest point run in a tunnel to meet the shaft. Through the shaft will be conducted a pipe line carrying water under heavy pressure and the gravel will be sluiced out through the tunnel.

The Pinte basin mining district in Kerr county, fifty miles northeast of Mojave, is proving to be very rich. It has been mined by ite men nearly forty years, and before them had been worked by Mexicans and Indians F. O. Wilkinson went into the district a few months ago and bought the Wheel of Fortune which had been abandoned in 1860 after the owners had scraped off all the fre milling ore to a depth of fifty feet. He went down five feet deeper and struck sulphide ore assayed \$356 to the ton at fifty-two feet, at fifty-three feet \$363, at fifty-four feet \$60 and at fifty-five feet \$2,504 in gold. He then stopped work and came out to send in a mill and a concentrator. Some of the tailings from the old, arastras worked years ago when put through concentrators have yielded \$500 in gold to the ton. About eighty miners are now in the camp and have taken up all the claims in the district. Two companies of Eastern capitalists have invested in the abandoned mines. The district lies in a basin on the top of a mountain 6,600 feet above sea level.

The Rand group of mines at Randsburg i shipping twenty-four tons of ore per day to the A large ledge of ore which goes \$100 to the

ton has been found in the 400 level of the Allison Ranch mine, Nevada county, which is now in the hands of Mackay & Flood. The Mayflower mine is now being worked steadily at a profit. Sinking began last week on the twenty-second level of the Empire mine at Gras Valley. On the 2,000-foot level a new ore whute has been struck.

On Rush Creek, Plumas county, Carter & Owens have a seven-foot ledge which mills \$17.50 per ton. The Green Mountain mine, together with nifteen claims, has been bonded by Cornell & Co. to a syndicate, which has becan extensive development work and is also reopening and retimbering the old tunnels.

Extensive development work is being done in the Yaeger mines in Trabuca Cañon, San Bernardino county, and a plant is being installed to work them by the cyanide process The Rose Cyanide Company was incorporated to work the tailings of the Rose mine in Holcomb Valley, of which there are 12,000 tons that will go \$5 per ton. The company will put that will go \$5 per ton. The company will put in a plant that can work fifty tons per day. A three-foot ledge has been uncovered in Shasta county which is thought to be the source of the gold quartz recently found near Castilla. The ore assays \$12 to \$32 per ton and carries 20

county which is thought to be the source of the gold quartz recently found near Castilla. The ore assays \$12 to \$32 per ton and carries 20 per cent. copper.

The Graves Brothers' mine, the Blue Jay, in Morrison's Gulch. Trinity county, is again turning out nuggets. The owners have been running in on the ledge and say that it unproves with depth.

The Altoona quicksilver mine, which was flooded last spring, has at last been unwatered and is to be started up on a larger scale than before. A two-mile tunnel is to be driven to drain the mine.

A phenomenally large strike has been made in the Beile, a new mine in Tuolumne county, two and a half miles north of the Rawhide and four and a half south of the Utica, on the mother lode. It was located by George Blake, who developed the Treatwell mine. In Alaska. Last summer he organized a company and gave a working bond upon the property. Last week at a depth of 200 feet an ore body assayed \$15 per ton, but it carries a streak eight feet wide which runs \$23 to the ton. The ore can be mined and milled for \$1.75 per ton. The Norwesian group of mines a guarater of a mile for the Black Hills for the present deady and the figure is put at a trific over \$9,500,009, of which nearly all connes from the mines near Deadwood and Lead, and from the siliceous beits. Plans are under way at several points about the Hills for new still in the coming year and total; There are now being treated in the Black Hills about Two Hit are fairly covered will in the coming year and totalist over \$100 tons of ore per day.

The hills about Two Hit are fairly covered with teams, carrying out lumber and supplies and taking back ore. In the Gilt Edge, at Union Hill, a nine-foot in the Gilt Edge, at Union Hill, a nine-foot is all soft or a width of a foot of ore has been cut, that runs about \$100 to the ton, except for a width of a foot with the supplies and taking back ore. In the Gilt Edge, at Union Hill, a nine-foot is all soft or a width of a foot with the present daily shipments of the carry and to t wide which runs \$23 to the ton. The ore can be mined and milled for \$1.75 per ton. The Norwegian group of mines, a quarter of a mile east of the Belle, has produced \$60.000 since January. The average value of its milling rock is \$30, but it holds many rich deposits of free gold.

BUTTE, Nov. 9.—For a piece of ground embracing only five acres, with dimensions 400 by 600 feet, the sam of \$601,000 was paid last week. But in Butte prices are not governed by the superficial area of the ground, but by the mineral deposits believed to exist down below. The price was paid for the Michael Davitt claim. The property was sold at sheriff's sale. There were three bidders in the field, the Boston and Montana Company, the Anaconda Company, and the Montana Ore Purchasing Company. The Boston and Montana Company was the successful bilder.

J. B. Haggin of New York is here, inspecting

B. Haggin of New York is here, inspecting works of the Anaconda Company

J. B. Haggin of New York is here, inspecting the works of the Anaconda Company.

A new shaft is being sunk on the Overland ground, near Montana City, 1,000 feet west of the old workings.

Sinking on the vein has been started at the Doucet Coal mine, near Castle.

Thomas Collins of lowa has purchased the Sunrise placer claim in the Sylvanite district.

Mrs. A. L. Thorn of Clancy, besides attending to her household duties, works a regular shift at the mine. Her husband owns the Mocking Bird mine and works it alone. Mrs. Thorn works the windlass while her husband is down in the mine, and thus for she has holsted twelve tons of ore to the surface and put it in sacks ready for shipment.

Some peculiar mineral has been discovered in a guich lying between Neihart and Barker. It is thought to be a form of graphite. It has a black metallic lustre, is soft enough to cut with a knife, and makes a black mark on paper. There is a large body of this newly found mineral.

A good deal of prospecting has been done the

There is a large body of this newly found mineral.

A good deal of prospecting has been done the past season in the Red Top section. The reports agree that the ledges are large and heavily mineralized, and besides the gold values there are, strong indications of copper. Work will be pushed this winter on a number of properties and by spring things will be ripe for great activity at Red Top.

The tunnel on the Jim Hill mine in the Sylvanite district has been extended to a length of 140 feet. It has cut through a soild mass of quartz fifty feet thick, which pas gold in places, and recently cut a small vein of blue quartz that pans and assays well. It is not certain whether this vein is the main pay ledge or whether the main ledge is still ahead. Some work has been done the past week in uncovering the capping of the Goldine Ledge, 190 feet north of the line of the tunnel. Many miners think the toldine is the main pay ledge of the Jim Hill.

The final payment on the Katie mine at Basin has been made by the Basin and Bay State Mining Company. The price was \$105.000. Work has been started in the erection of a new smelter and concentrator.

ALASKA.

SEATTLE, Nov'6.—In eleganing up the final

SEATTLE. Nov. 6.—In cleaning up the flume at the Baid Eagle usine Sum Dum. which carries the ore from the mine to the mill, 4.000 feet, the workness gathered up concentrates valued at over \$6,000. The flume is lined with sheet iron, and the rich concentrates had collected in spots worn out by constant use. The product of this mine has annually amounted to about \$100,000, but this year has been devoted mainly to developing and systematically opening the property and making other improvements. It is anticipated that the output will be at least doubled.

The Yakima-Willis group of seven claims on Douglas Island, lying parallel to the Treadwell, is under bond to San Francisco capitaliste, who are doing annual assessment and development. A main working shaft is being sink to determine the depth to which the ore extends. The width of the ledge, is from 800 to 1.300 feet, and is cross-cut by Heady Sullion Creek, exposing the ore the entire width of two chaims and a fraction of a third. Two shifts will be capaged all winter in sinking the shaft and cross-cutting the ore at depth, when estimates will be made on mill and concentrating plants. A new ten-stamp will is under construction at Sum Dum for the Chief, which will be in operation about Dec. 1. Seven new mills are

MORE HYDRAULIC MINING. orn Aleaks, to be completed by April 3, making

in all 140 stamps.

WASHINGTON.

SEATTLE, Nov. 6.—The camp that is having the greatest activity in the Bate at present Is Eureka, in Seevens county, where the Clark Brothers of Butte, Mon., have invosted a great deal of money and are making extensive developments on their purchases. There are 1,200 miners and camp followers in the district, who have gathered within the past four months on the reports of rich strikes and numerous transfers. Five of the largest claims in the district are opening up so flatteringly that the owners have reason to believe they will take position among the best copper sold producers in the county. The ore is high grade, is found in great abundance, and is easily convertible into matte and buillon.

On the Biack Bear claim, seven miles from Bossburg, they are running a tunnel which will tap the ledge at a depth of 300 feet below the present works. The ore assays from \$26 to \$60 in copper and gold, the principal value being in gold. Bossburg is the nearest point from the unine to the railroad, and excellent facilities are offered for the handling of ores consigned to Eastern or Western reduction works.

In the Bonanza mine a splendid body of

consigned to Eastern or Western reduction works.

In the Bonanza mine a splendid body of galena has been struck, and an increased force has been put on the property, opening up the new discovery preparatory to shipping. This is an oid galena district, but the ore bodies have been so unreliable in regard to continuity that the district was regarded with a good leal of suspicion by mining men.

The Wilbur claims at Index have contracted for the transportation of several carloads of copper-silver from the mine to the railroad. This is among the new producers of Snohomish county, which numbers more shipping properties than any other in the State.

BRITISH COLUMBIA.

BRITISH COLUMBIA.

SEATTLE, Nov. 6.—On the west coast of Vancouver Island prospecting was at first confined to the search for iron ores. During the past season copper and gold ores have received more attention than any others, and some valuable discoveries have been made, extending from the water's edge back into the interior for several miles. In Alberni district a large amount of development has been done, and enough free-milling ore uncovered to justify the building of a gold mill. The Alberni Consolidated, upon which the greatest amount of work has been done, has ore that assays from \$10 to \$100 gold per ton, and it is estimated that there are over \$100,000 of this quality of ore blocked out in the workings.

The Canadian Gold Fleids Company, which is operating the Sunset group of mines, in Trail district, has recently installed a seven-compressor drill with great success, and is pushing its work with unusual energy.

ARIZONA.

its work with unusual energy.

ARIZONA.

TUCSON, Nov. 5.—The copper output of Arizona last year was 71,000,000 pounds, or 21,000,000 pounds more than in 1895. Copper is now king in this Territory. This year's product will exceed that of last year.

Hoyt & Clark have struck a good streak of ore in the Jessie mine. It is expected that it will lead to the main ledge.

Reliable reports from the Pearce mine say that the ore body is getting richer the nearer the foot wall is approached. The main body of ore in this property has never been touched, yet the monthity output is over \$350,000. The lower grade of ore is milled at the mine, the richer being shipped to Pueblo, and there is not a pound of waste matter.

The Lanahan Brothers are reported to have made a rich strike in the Silver Bell district. near fueson. They have a mountain of ore, and assays lately made show gold to the amount of \$294 per ton.

The Higgins group of copper mines, southeast of the great copper camp of Bisbee, has been bonded to a New York syndicate for a large amount. The company has already the machinery on the ground for boring and determining the value of the mines.

The Kasaer Gold Mining Company's mill in Lost Guich is about completed. The stamps will begin to drop on ore soon, and as the supply is abundant, it is expected to keep the mill in continuous operation.

Twenty-four inches of \$40 ore in the Thorn shaft and twenty-six inches of \$65 ore in the Aztec mine are the latest report from the Sun Dance group near Prescott. The last car of concentrates ran \$155 per ton.

UTAH.

Salt Lake City, Nov. 8.—A cyanide milling

UTAH.

SALT LAKE CITY, Nov. 8.—A cyanide milling plant is to be erected on the Mammoth group at Bingham.

The Buckeye group at Diamond, Tintic district, has been leased for two years. The main shaft will be put down to the 600-foot level.

Bingham's ore output for October was 4,722 tons. This was an increase of 1,012 tons over that of September.

The Mercur Company on Saturday shipped gold cyanides of the value of \$25,000 and the Geyser-Marion sent out \$8,500 more. A shipment from the Sacramento, valued at \$8,000, was also made. The Daly Company shipped 18,500 fine ounces of sliver and the Ontario Company 23,000 ounces.

At the Mercur mines a third parallel vein of milling ore has been opened ninety feet below the old workings. This adds an immense amount to the already great ore reserves.

SOUTH DAKOTA.

camp is one of the richest and busiest in the

DENVER, Nov. 10.—This week a meeting of smelter men is in session to which representatives of all the smelters in the West have been sent. The topics are charges, the fees of samplers, and the lead quotations published in New York. The smelters are finding the competition of chlorination and cyanide works entirely too active. The aim is to confine the newer processes to ore running less than \$20 in value. The samplers are said to be charging fees out of proportion to the work involved, and this the smelters are trying to correct. The lead quotations in the New York exchanges are not in accordance with market prices.

During October the Cripple Creek district produced 30,000 tons of ore, divided into smelting ore, milling ore, and ore to be treated by the low-priced processes. The mill ore averages \$70, though the values of different consignments have a wide range. The process millis treated 21,000 tons having a value from \$22\$ to \$8\$ per ion. This amount, going to the process plants, the smelter combination whehe COLORADO.

process plants, the emeter combinated to curtail.

The Victor mine at Cripple Creek is scheduled to resume dividends of \$10,000 per month. Dividends were stopped in March for no very clear reason. It is likely that extra dividends will be paid at intervals during the

dividends will be paid at intervals during the year.

The Cripple Creek district will ship out more ore in November than during any other month of the year. There is a considerable amount of prospecting work going on while the regular shippers are doing fairly well.

It is announced that H. J. Bolles has completed the sale of a five-eighths interest in the Farwell group of claims in Independence district, near Aspen, to a Boston syndicate for \$78,000.

Fr. 000.

The American Nettie at Ouray recently made a shipment of ore running \$20,000 to the ton. The Wedge mine is continually improving and is now a bonanza.

The most notable low-grade process of the year is that of the Plomo Mining Company, which profitably treats \$4 a ton. The company is operating in Costilla county, where it has an immense quarry of ore. The mill makes a net profit of \$2.04 a ton. Near by a Wisconsin company has just received ten carloads of placer machinery, including a plough capable of handling 200 yards of dirt dally. The company anticipates a profit of 50 cents a yard.

LAKE SUPERIOR.

HOUGHTON, Mich., Nov. 13.—The consolidation of the Oscoola, Tamarack Junior, and
Kearsarge mines has been effected, the deeds
transferring the latter two to the Oscoola Consolidated Company having been filed. It
should be possible for the consolidated property to earn about \$4 per share next year, at
the present price of copper, on the stock actually issued. The property can scarcely earn
and pay \$6 per share next year, as is asserted
by the zealous friends of the stock. The Jaceola is a fine property and has paid over two
millions in profits.

MEXICO. LAKE SUPERIOR.

GUAYMAN, Nov. 6.—The Bonancita Valley, in the Yaqui country, is declared by those who have visited it, to be wonderfully rich. A party who have been examining the valley say that the ground is pay dirt from grass roots to be! rock, varying in depth from eighteen inches to forty feet. They say that the Bonancita is no poor man's country, and that large associations of capital will be necessary to work the ground. MEXICO.

tions of capital will be necessary to work the ground.

Buring the first half of this year 9,335 mining claims were patented in Mexico.

The Copper Queen Company has obtained a concession to erect a smelter at Hermosillo. State of Sonora, and has deposited a guarantee of \$10,000 in gold coin to comply with the concession. It will treat copper, silver, and lead ores.

The system for reducing refractory ores adopted by the superintendent of the barra god mines at Calmalli, Lower California, is giving very satisfactory results. The Triunfo aliver mines near La Paz, in the southern district of the poninsula, are still being worked at a small margin of profit. About 1,000 men are employed and forty stamps are kept constantly pounding.

TWILL BE A FINE CHURCH. CORNERSIONE OF THE NEW DIVING PATERNITY LAID TESTERDAY.

The Structure Alone to Cent 8850,000 Exclu Sinude-Dr. Katon's Address on Putting the Stone in its Pince-Mr. Carnegie's Gift.

The cornerstone of the new Church of the Divine Paternity, at Seventy-sixth street and Central Park West, was laid yesterday after soon with impressive services. The walls of the new structure have been partly raised, and between the high masses of rock, in a space open to the sky, a large congregation was gath ered to witness the ceremony. Seats were provided for a few, but many stood. The Rev Charles H. Eaton, D.D., the pastor of the church. officiated. He was assisted by the Rev. W. S Crowe of the Church of the Eternal Hope. There were also present several other Univer salist ministers, among them being the Rev. Lyman Ward of the Second Universalist Church. the Rev. J. Coleman Adams of Brooklyn, and the Rev. Dr. Dickinson of Portsmouth, N. H.

The services were opened by the marching in of a large selected choir, who sang a hymn as they walked to the temporary platform erected at the western end of the church. The Rev. Dr. Eston then read a lesson from the scriptures and after an anthem, sung by the choir, the Rev. Mr. Crowe delivered a short prayer, to which a response was sung. The act of laying the cornerstone occupied

only a few moments, the anticipated plan having been changed because of the cold weather Dr. Eaton, standing at a temporary pulpit under the northern corner of the transept, said: "This church, in its qualities of beauty and

utility, represents the religion which we cherish and the expression of our belief in the future of the Universalist faith. It is the duty of the clergy and the laity of the church to aid in the eaching of a rational interpretation of the Gospel; it is their duty to seek to encourage a proader sympathy with all men-rich and poor, educated and uneducated; it is their duty to strive after the highest spiritual ideals. Before taking up the trowel to lay the mortar

strive after the highest spiritual ideals."

Before taking up the trowel to lay the mortar, Dr. Eaton enumerated some of the articles which had been placed in the copper box. The contents of the box in the old Church of the Divine Paternity, which stood at Forty-fifth street and Fifth avenue, were transferred to this cornerstone. There were also placed in the box a large amount of denominational literature pertaining to the church and its history, a list of the officers and committees of the parish, a number of reports and sermons, representative coins of this country and of Canada, photographs of the old and new churches, and the daily papers of last Saturday. After a hymn by the choir Dr. Eaton delivered his address:

"Except the Lord build the house, their labor is but vain that build it. Hay the cornerstone of an edifice to be here erected, by the name of the Church of the Divine Paternity; to be devoted to the worshin of God, the universal Father, under the leadership of His Son, Jesus Christ, to the reading and preaching of the Holy Word, to the celebrating of His sacraments, to the offering of the sacrifices of prayer, praise and thanksgiving, to the blessing of His people and the performances of all other offices of the Christian religion. 'Other foundation can no man lay than is laid, which is Jesus Christ,' through whom to God the Father be honor and praise, world without end."

The singing of "America" and the pronouncing of the benediction concluded the services.

Work on the new Church of the Divine Paternity began last fall, after the workmen had begun to tear down the old church at Forty-fifth street and Fifth avenue. Since that time the congregation has met at St. Stephen's Episcopal Church, on West Forty-sixth street. The new church will be one of the finest in the city, its estimated cost being \$350,000, exclusive of the land on which it stands. The edifice covers 150 feet on Central Park West. The tower, which will be one of the finest in the city, its estimated cost being \$350,000, exclusive

will form a part of a reredos, or altar screen, to be made of carved stone.

On both sides of the altar will be a large memorial organ, which will be the finest of its size in the city. It is the gift of Mr. and Mrs. Andrew Carnegie, in memory of Mrs. arnegie's parents. The mot ve power of the organ will be electricity, and connected with the large organ by electricity there will be an ocho organ, which will be placed at the castern end of the church. At the right of the altar in the chancel will be placed Augustus St. Gandens's memorial of the late pastor, the Rev. E. H. Chapin.

The windows of the church will be constructed of rich material. The designs of the two large transept windows, which are 34 feet by 25 feet, will symbolize the deeds of Christ and His parables. Elaborate carved stone tracery is to be used in the construction of these memorials. In the four nave windows will be symbolized scenes from Christ's life—the birth, the transfiguration, the ascension and the resurrection. The chancel window will portray Jesus and the four evangelists, and on the large castern window will be designs of the apostles. The four small transept windows will contain scenes symbolizing purity, courage, temperance, and faith, hope, and charity. A number of the windows will be presented as memorials.

The room in the tower at right of the eastern entrance will be constructed with a stone-groined ceiling. This room will be used as a mortuary chapel. The church has been designed to allow several rooms to be used by the Sunday school and for various social purposes. Throughout the church is constructed of fireproof material, and is heated and lighted according to the latest devices. It is essentially massive and strong. It will seat about 1,000 persons. The contract calls for the completion of the structure by next May.

ITS GOLDEN ANNIVERSARY. ubiles Service of the North Presbyterian

Church Yesterday. The North Presbyterian Church, at Ninth avenue and Thirty-first street, celebrated the fiftieth anniversary of its founding by a jubilee service yesterday. The church was decorate d elaborately with palms, flowers and the national colors. Back of the pulpit hung por traits of the four pastors of the church, and above these was a large shield of white carnations bearing the dates 1847-1897 in red. The Rev. Dr. S. B. Rossiter, the pastor, preached historical sermon and the Rev. Dr. R. R. Booth offered prayer. The singing was in charge of the junior and senior choral societies and was under the direction of C. N. D. Powers The North Presbyterian Church was organ-

ized on Sunday, June 27, 1847. At that time the city had hardly extended as far uptown as Thirty-first street, and the region, round about was known as "Old Strawberry Hill." The Rev. Washington Roosevelt was the first pastor. He was installed in 1849, and the same year saw the erection of a frame church edifice on Thirty-second street, between Eighth and Ninth avenues. In 1857 Mr. Hoosevelt resigned and br. Edwin F. Hatfield of the Seventh Presbyterian Church was called to the pastorate. He was a flery, energetic man, and under his guidance in 1857 the present church building, costing over \$50,000, was erected. The membership was then about 300.

The third pastor was the Rev. Dr. Thomas Street. In his pastorate, in 1871, the church passed the most important crisis in its history. An indebtedness of \$30,000 incurred in building was raised within three months. Dr. Street resigned in 1873 and was succeeded by Dr. Rossiter, who has had a very successful pastorate.

In 1879 the church was completely redecthe city had hardly extended as far uptown as

Dr. Rossiter, who has had a very successful pastorate.

In 1879 the church was completely redecorated and repaired, and two additions have been built, in 1884 and 1886, for the use of the Sunday school and other church organizations. The church has gained, on an average, seventy members for every year of its existence, and has now a total membership of over 3,000.

A "gold coin collection" was taken after the sermon yesterday while the senior choral society rendered Schillings "Jubliste." A service for young men was held in the evening. The Rev. Dr. C. C. Hall, President of Union Theological Seminary, gave an address, and the music was in charge of the Lenox Male Quartet.

GOLDEN JUBILEE A DEST RAISER The Cliston Avenue Congregational Church

Wipes Out Its 884.000 Indebtedness. The Clinton Avenue Congregational Church of Brooklyn will be fifty years old on Wednesday next, and the celebration of the golder jubilee was begun yesterday morning, when the pastor, the Rev. Dr. T. B. McLeod, preach d an anniversary sermon. He called attention to the fact that there was a debt of \$34,000 on the church, and said he hoped that this would be wiped out during the celebration. He said the wiped out during the celebration. He said the collection would be devoted toward paying off the debt. After the services Dr. McLeod said that \$30,000 had been subscribed during the morning and that pledges had been made that the other \$4,000 would be forthcoming at the public meeting to be held in the church on Wednesday night, when addresses will be made by the Rev. Dr. R. S. Storrs, the Rev. Dr. A. J. Lyman, and the Rev. Dr. R. R. Meredith.

SUCCESSOR OF CHREST CHURCH. The Church of the Transdiguration Coleb its Seventieth Austremany.

The seventieth anniversary of the Church of the Transfiguration at 25 Mott street was cele brated yesterday by a solemn pontifical mass at 11 o'clock and a sacred concert and song lec ture by the paster, Father McLoughlin, in the evening. The celebrant of the mass was Bishop McDonnell of Brooklyn; his assistant, the Rev P. F. McSweeny; deacon, the Rev. James F. Barry; sub-deacon, the Rev. Daniel P. Ward; master of ceremonies, the Rev. Michael Mc-Keheler; assistant, the Rev. W. J. Donohue The preacher was Mgr. Mooney, V. G. Among those present were the Most Rev. Archbisho Corrigan, the Right Rev. Bishop Farley, V. G., the Very Rev. Chancellor Colton, and Fathers Quinn, Wall, McGoldrick, Donnelly, Hickoy, Duhigg, Zabologio, Barrett, Concily, Burke and Malone. The mass was Hamma's, in honor of St, Francis of Assisi; Charles C. Dunn, o ganist; Marie Thornton, seprano; Rosemary Campbell, alto: J. J. Colligan, tenor, and M Loesch, basso. The children's chorus of fifty dressed in white, sang a hymn composed for the occasion by Mr. Dunn on Cardinal Newman's poem "Oh Ye Who Seek the Lord."

The Church of the Transfiguration and St James's Church, in James street, both claim to be identical with Christ Church, which was founded in March, 1827, by the Rev. Felix Varela, a Cuban exile, who purchased a Protestant church property in Ann street and called it Christ Church. At that time there

estant church property in Ann street and called it Christ Church, At that time there were only three other Catholic churches in the city, St. Peter s. the old St. Patrick's Cathedra and St. Mary's. In 1836 the Ann street building became unsafe, and Bishop Hughes bought the property in James street in the name of the trustees, of Christ Church, on which St. James's Church now stands. Christ Church parishioners objected to going so far from the old site, however, and Father Varela was commissioned to purchase the Scotch Presbyterian Church in Chambers street, where he incorporated the Church of the Transfiguration in 1837. The church was moved atterward to its present site, upon which, in 1815, the Moravian Brothers had built a church that was destreyed by fire.

The present building was erected in 1835 as the Zion Episcopal Church, and its exterior was not altered when the Church of the Transfiguration purchased the property after the Chambers street edifice became too small for its congregation. In the meantime a building was erected on the James street property, into which, when completed, moved some of the Christ Church congregation under the Rev. Joseph A. Schneller, who had been promoted from the assistant pastorate of Christ Church to the pastorate. The name of Caris: Church had been retained at first because the old building in Ann street was so known, but the name and protection of St. James the Apostic were invoked for the James street church, though the bell to this day is inscribed "Right Rev. J. Dubois to Christ Church is 36, James the Apostic were invoked for the James street church, though the bell to this day is inscribed "Right Rev. J. Dubois to Christ Church, 1836." The rivalry between the two churches is perfectly friendly, and has never been decided. Archbishop Corrigan. at the dinner which followed the mass yesterday, drank a toast to "the two successors of Christ Church."

Among the 1,250 parishioners of the Church of the Transfiguration are three Chinamen, and

Among the 1,250 parishioners of the Church of the Transfiguration are three Chinamen, and several Chinese children attend the Sunday

DEDICATED BY BISHOP WIGGER St. John's New Roman Catholic Church is Jersey City.

St. John's new Roman Catholic Church, the Boulevard and Van Winkle street, Jersey City Heights, was dedicated yesterday by Bish op Wigger of the Newark diocese, assisted by a large number of visiting priests from various parts of New Jersey and New York.

The new church is of the pure Roman order of architecture and has been in process of construction for five years. It is built of blue stone and dressed granite and represents an outlay of about \$200,000. The interior decorations are very elaborate. Perhaps the principal feature in the embellishment is the art displayed in the grouping and colors of the ubjects of the stained-glass windows. On each side of the main altar are five life-size panels of different saints, and in a niche behind the altar will stand a statuary group representing St. John the Baptist baptizing the Savfour The main and side altars are of Carrara marble and the aisles of the church are laid in marble mosaic.

and the aisles of the church are laid in marble and the aisles of the church are laid in marble mosaic.

The pews are of quartered oak, richly carved at the ends, and they provide seating capacity for about 1.100 persons. Since Father Ter Woert took charge of the parish thirteen years ago he has built two churches, a parochial school, a Sisters' house, and a rectory, and the total amount contributed by the parishioners for church purposes during the same period exceeds \$160,000. The new church is practically completed with the exception of the tower. This will be a reproduction on a small scale of the tower of Madison Square Garden.

The music of the mass was very elaborate, and the sermion was preached by Mgr. de Concilio, rector of St. Michael's Church of Jersey City. Pontifical vespers were sung at 7:30 P. M. by Bishop Wigger. The church was crowded at both services.

Among the clergymen who took part in the dedication ceremonies were Bishop Wigger. Dean McNully, Mgr. de Concilio, the Rev. L. C. M. Carroll, T. M. Wailace, Chancellor of the Diocese: the Rev. Father Hanpes, S. J.; the Rev. J. J. Boylan, the Rev. Father Vincent.

Dr. Savage's Church Club.

The Rev. Minot J. Savage of the Church of the Messiah issued an invitation from the pulpit last Sunday for all the men of the church to meet him at 61 East Thirty-fourth street. A large number responded, and Dr. Savage ad dressed them on the need for a club or society of the men of the church, to meet during the winter to discuss church work and for social intercourse also. It was decided to meet once a course also. It was decided to meet once a month for a dinner at some hotel yet to be selected, and the following officers were appointed: President, Sigourney B. Fay; Vice-Presidents, R. R. Conlin and Melbert B. Carey; Secretary, Prof. J. B. Chittenden; Treasurer, Alfred Robinson. Executive Committee: W. H. Webb, Gilman H. Tucker. De Borien Wilmot, R. S. Peale, and Raloh Waldo. The name of the club is to be decided by vote of the members at the first dinner this evening.

J. WINTER, 189 East 59th et.

TAKE GOOD ADVICE.

Many Most and Women Mave Met III Recense They Neglected to Do So "It is a wonder people live as long as they do," said a leading physician while conversing with some newspaper friends recently. "Every breath that is taken contains poison. Millions of germs. so small they cannot be seen by the naked eye are drawn into the lungs, the throat, the stom ach, and while many of them die, thouse them live and feed upon the body and cause what is called disease. Germs are the source of all disease; kill the germs and you cure the dis

So interested were his listeners with the above remarks that the doctor continued: "You natu-rally ask what will kill these germs! I am sorry to say, only a few things. The surest safeguare against all germs is pure whiskey-pure, mind you. Germs do not thrive where it is used judicionaly. Unfortunately; there is but little pure whiskey to be had, and I know of but one which I can absolutely recommend, and that is Duffy's. I have analyzed it carefully and found no fusel oil, no impurities, and nothing that could harm even a child. Duffy's Pure Malt could harm even a child. Duffy's Pure Malt Whiskey is recommended by such high medical authorities as Dr. Henry A. Mott. Prof. William T. Cutter, Dr. Carnwell and others. Understand me, I advocate the use of whiskey only as a medicine and not as a beverage. As a medicine, it is atrengthening, restoring and beneficial, and is indorsed in the highest terms. Under no circumstances, even as a medicine, use any but the pure, and do not allow any druggists to persuade you to take any other."—Adv.

"STUSS" GAMBLERS RAIDED

40 Per Cent. More. When Koppel Sugarman, who keeps a clear

store at 82 Forsyth street, was arraigned yesterday in the Essex Market Court for keeping gambling house Detective Cohen of the Eldridge street station produced 30 cents and a dirty pack of cards as the proceeds of the raid made by him on Saturday night. They were playing 'stuss,'" said Detective

Cohen. "I watched through a window for an bour and saw Sugarman and three other men playing. When I made the raid Sugarman had won fifteen cents. I understand the game and am positive."
"What is 'stuss'!' asked Magistrate Cornell. "It is something like faro," said the detec-tive. "It is a Hebrew game and differs from

to it is a Hebrew game and differs from faro only slightly.

"How does it differ i" asked the Magistrate.

"The percentage of the dealer is increased over 40 per cent.," answered the detective.

"How do you play it i asked the Magistrate. Detective Cohen produced a pack of cards, and spreading them out before the Magistrate explained that the player bet on the turn of the card. The Hebrew adaptation of the game, according to the detective, was that when a picture card was turned, no matter how the player bet, the dealer raked in the pot.

Lawyer Alter appeared for the prisoner, and, grabbing the cards, shuffled them and attempted to show the Magistrate how the game could be played for matches or bon bons.

"I guess it is gambling all right," said the

"I guess it is gambling all right," said the Magistrate, and he held Sugarman for trial.

Bismarck Worsted in a Quarrel with His

Young Wife. John Bismarck, 60 years old, of 342 Monmoutl street, Jersey City, quarrelled with his wife yesterday and tried to beat her. He was prompted by jealousy. Mrs. Bismarck, who is only 33 years old, struck her husband on the head with a bowl and severed an artery. He bled severely. He was taken to the City Hospital and his wife was locked up to await the result of his injuries.

Nicodemus Boczkowski, the Polish banker who fled from Jersey City with the assets of the bank, and was captured in Buffalo, was brought back on Saturday night by Detective Pearson back on Saturaly night by Detective Pearson. He will be arraigned in court this morning, and a number of complainants will appear against him. Besides running a bank on a small scale, Boczkowski taught a Polish school, and the parents of many of his pupils are alleged to have been victimized by him.
